

Strengthening, preserving and promoting God's plan for marriage & family, the sanctity of life, & religious freedom in Wisconsin.

MARRIAGE

God created marriage between one man and one woman as the foundation of a strong society, especially for children. We believe the government should promote the institution of marriage in society and we support initiatives that reduce the incidence of divorce in Wisconsin.

FAMILY

God ordained the family unit to raise up the next generation. We believe parents are the authority in their children's lives, not the government. We support school choice and decreasing the tax burden on hardworking Wisconsin families. We oppose pornography and gambling.

SANCTITY OF LIFE

On the sixth day God created life and called it good! We believe in protecting the sanctity of human life – unborn and through natural death. We support teaching abstinence in our state's secondary education system and championing adoption as an alternative to abortion. We oppose stem-cell research that requires the destruction of human embryos.

RELIGIOUS FREEDOM

Religious freedom is the right of individuals to practice their religion without government interference. We believe this is one of the most important liberties granted to citizens of this nation. Therefore, we support religious freedom for all faiths and all people.

SCHOOL CHOICE

Wisconsin's parents should have education options available to them and their children. Such options include but are not limited to home schooling, voucher programs, and open enrollment. With these options, parents are better able to select an education program that is appropriate for their child.

Strengthening, preserving and promoting God's plan for marriage & family, the sanctity of life, & religious freedom in Wisconsin.

INTELLIGENT DESIGN

Children in Wisconsin's public schools should have the right to learn about competing theories regarding the origin of life on Earth. Currently in Wisconsin public schools, the theory of evolution is often taught to the exclusion of any other theory. Therefore, we support the idea of "teaching the controversy" and allowing students to draw their own conclusions about the debate surrounding the origins of life.

PORNOGRAPHY

Pornography is harmful to society because of its addictive effects and must be controlled by the government. The use of pornography has negative consequences for both the institution of marriage and the family. Child pornography is particularly heinous as it violates the children forced to engage in the production of such pornography and too often results in children being victims of sexual assault.

GAMBLING

We oppose the expansion of casinos and other gambling activities in Wisconsin. Such activities are harmful to both the state's communities and economy. Gambling harms communities by placing an addictive activity in locations where individuals can go into debt, therefore taking financial resources away from their families.

TAXES

We support decreasing the tax burden faced by hardworking Wisconsin families, as this burden harms both communities and children alike. Further, we oppose legislation and laws that place a heavier tax burden on married individuals than those who are co-habiting, as this penalizes the institution of marriage.
